

FUEL MANAGEMENT

 **TOYOTA FLEET MANAGEMENT**

Here for you

FUEL MANAGEMENT

Effective fuel management for your business

How can Toyota Fleet Management assist with Fuel Management?

Fuel Management is a critical component in managing your company fleet effectively. More than 30% of your fleets running cost can be consumed in fuel. Toyota Fleet Management offers a choice of market leading fuel management solutions.

What are the benefits?

- ✓ Fuel cards provide you with a discount on fuel also known as a rebate
- ✓ The agreed rebate is off the pump price, so you always know your true cost of fuel
- ✓ All fuel cards are safe and secure. Cards are PIN protected, require an odometer reading every time and can be further customised to meet specific risk and security requirements
- ✓ We can help negotiate the best deal with your chosen fuel supplier
- ✓ Fuel transactions are included on one invoice along with your other fleet management expenses

Do I have a choice of supplier?

Toyota Fleet Management has an alliance with Caltex/Ampol. Fuel and oils are available from over 2000 sites within Australia.

Additionally, we also have an alliance with MotorPass. Drivers can purchase fuel and oils at any of the 6,500 service stations that are part of the MotorPass network.

How can I get more information?
